Years building Awimax

BIOGRAPHY

Engr. Abdulwahab Yesufu is a chartered mechanical engineer (COREN, FNSE, NIMEchE) and project management specialist with three decades of experience in Nigeria's oil and gas sector. After earning his B.Eng. in Mechanical Engineering from Ambrose Alli University and a Master's in Project Management from the University of Lagos, he built his career through hands-on roles at Banner Construction Nigeria, Monier Construction Company, the Pipelines and Products Marketing Company (PPMC), and Coscharis Auto, before joining Sykes Energiprojekts Ltd in 2006. Over the following decade, he rose from Project Engineer to Cost/Design Engineer to COO/Projects Director, overseeing the delivery of turnkey oil & gas infrastructure projects across Lagos, Warri, Calabar, and Port Harcourt — spanning facilities design, construction, pipeline and piping installation, tank farm construction, and equipment procurement. In 2016, he founded Awimax Engineering Services, which has since grown into the Awimax group — spanning engineering services, energy, and gas — under his leadership as Founder and CEO for the past decade.

TRACK RECORD

Lagos

Wosbab Energy · Rano Depot · Juhi 2 Aviation Facility · Rahamaniyya

Warri

Matrix Energy · Bluefin Energy

Calabar

Fynefield · Ibafo Depot · Mettle Depot

Port Harcourt

Master Energy

AVAILABLE SPEAKING TOPICS

- EPC delivery in Nigeria's downstream petroleum sector
- From engineer to founder: building an engineering business in Nigeria
- Tank farm and depot infrastructure: design, safety, and delivery
- Project management discipline in technical industries
